WOUNDS

First remove any foreign particle (like glass piece etc.) From the wound. Clean well with water and apply Tincture iodine put a bandage and seek medical attention.

GENERAL ADVICE

For severe burns caused due to acid keep the burnt part in Sodium bicarbonate- Petroleum jelly mixture and for those burns caused due to alkali keep in the Boric acid solution for at least half an hour. While packing compounds of Cobalt, Chromium, Cadmium, Bismuth, Barium, Lead, Tin etc., It is necessary to wear respective safety equipments / guards (like gloves, goggles, face mask etc.) In case these chemicals are accidentally consumed try to spit it out even by vomiting. While packing Formaldehyde or Hydrogen peroxide. If it falls on body or cloths, wash with plenty of water. If copper sulphate is consumed accidentally drink a cup of warm water containing a spoon of Sodium chloride or zinc sulphate. It is duty of everyone to ensure that chemicals do not come into contact with the body through their mouth, eyes, ears & nose. Also ensure that the necessary safety equipments are used. After providing first aid, seek medical attention, if necessary.

FIRE

Do not use water to extinguish an electric fire as it could give you a shock. Use dry powder fire extinguishers. If solvents lighter than water (like Xylene, Benzene, Acetone, I.P.A., Methanol, Petroleum ether, Diethyl ether etc.) Catch fire, use wet blanket to cover the fire or use a suitable fire extinguisher. Splashing water on such fires could spread the flame. Be familiar with the usage of various types of the extinguishers.
